

GREEN CORE

The bio wad range with the ballistic performance of all time

The Green Core logo on each package endorses the use of this wad type.

GREEN CORE is a range of wads produced with 100% biodegradable and compostable material. The wad material is **EN 13432** certified. This means that (in industrial composting terms):

- It degrades by at least 90% in 6 months when subjected to an environment rich in carbon dioxide;
- When in contact with organic materials for a period of 3 months, the mass of the material decomposes for 90% from fragments less than 2 mm in size;
- The material has no negative effects on the composting process;
- Microplastic free;
- The decomposition residue is not harmful to flora and fauna.

Cartridge	Gauge	Case length [mm]	Head [inch.]	Head [mm]	Color	Load [g]	Shot size [n°]	War	*Velocity V ₀ [m/s]	Pressure [bar]
